

## *Carson HookUpz 2.0*

The Carson HookUpz 2.0 allows you to attach your smart phone to binoculars, spotting scopes, rifle scopes, telescopes, microscopes & a myriad of other scopes. Once attached the HookUpz gives you the ability to digitally record your subject and then easily share with your friends using email or social media. The HookUpz is a universal adapter and will work with smartphones up to 3.75 inches wide and will fit any scope with an eyepiece between 25mm and 58mm. So get yourself a Carson HookUpz 2.0 and start making some awesome videos & photographs to share with your friends. [www.carson.com](http://www.carson.com)

## *Lupine PIKO 4*

Lupine has released the new generation of the Piko 4 bike light which has increased peripheral illumination and increased range from the previous model. The Piko 4 features a 55 gram light weight compact 2 bulb head which has 6 brightness levels ranging from 40 – 1500 lumens. The waterproof Lithium Ion battery is tough as nails and has a run rate of 1:45 hours to 80 hours depending on the light setting. Recharging takes less than 3 hours and combined with the flexibility of 6 different brightness modes, the Piko 4 will meet any demand you need from your bike light.
